DETAILED ACTION

Drawings

The corrected or substitute drawings were received on 5 April 2002. These drawings are approved.

Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, and 14-32, and claims 52-61, drawn to the control device of seismic cable, classified in class 367, subclass 019.
 - II. Claims 33-41 and claims 42-50, drawn to the method of control, classified in class 114, subclass 244.
 - III. Claim 51, drawn to method of the storing of streamer cable on a drum, classified in class 114, subclass 242.
2. Inventions I-III are related as sub combinations of control device, method of control and method of storing seismic cable on a cable drum that appear disclosed as usable together in various combinations.
3. The sub combinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the inventions as listed above have separate utility as they recite distinct seismic cable apparatus, method of controlling and cable drum storage that are not required of the other groups. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2862

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

6. A telephone call was made to John H Bouchard on 17 June 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor Taylor whose telephone number is 703-305-4470. The examiner can normally be reached on 8:00 to 4:30 PM.
